Art Unit: 2837

1. Claim 1, and 3-5 are objected to because of the following informalities: the phrase "What is claimed is" does not belong to claim 1. Further, "a detection device" in claims 3 and 4, line 2, has been recited in claim 2 and should be "said detection device"; "the black key" in claim 4, line 2, lacks antecedent basis; "black key movement" in claim 5, line 3, has been recited in claim 1 and should be "said black key movement".

Appropriate correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2, 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Yasutoshi et al. (6,037,534).

Regarding claim 1, Yasutoshi et al. disclose a device comprising: circuitry and detection devices (20) to detect and communicate white and black key movement; surface means (27) operatively connected (23, 24) to said circuitry and detection devices for detecting key movement (Fig. 3, and col. 4, lines 16-20).

Regarding claim 2, Yasutoshi et al. disclose a plurality of flexible inserts (21, 22), each of said inserts positioned between a key of the keyboard and a detection device (Fig. 3), said insert changing position in relation to movement of the key (Figs. 3 and 4).

Regarding claim 4, Yasutoshi et al. disclose the claimed invention (Fig. 3).

Art Unit: 2837

Regarding claim 5, Yasutoshi et al. disclose the claimed invention (Fig. 3).

Regarding claim 6, Yasutoshi et al. disclose the claimed invention (Fig. 3).

4. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The claim is allowable over the prior art for at least the reason that the prior art fails to reasonably teach or suggest a vertically mounted flexible insert positionable between a black key and a detection device as set forth in the claimed combination.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shih-yung Hsieh whose telephone number is 703-308-1031. The examiner can normally be reached on 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Nappi can be reached on 703-308-3370. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-3431 for regular communications and 703-305-3431 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
